**Diabetes Boot Camp for Prescribers** was designed in response to the increasing burden on primary care in terms of diabetes management and the evolving roles for health professionals. This program is specifically designed to meet the learning and practice needs of family physicians and nurse practitioners on the front line of diabetes care, but will also be of interest to pharmacists and other allied health professionals.

### OBJECTIVES

- To familiarize participants with the therapeutic agents available to treat hyperglycemia, hypertension and dyslipidemia
- To provide decision support strategies for when and how to choose second- and third-line oral agents, and when and how to initiate insulin (basal and bolus) or other injectable agents
- To learn how to use blood glucose pattern management to make treatment changes
- To review therapeutic approaches to maximize cardiorenal protection

### FORMAT

- Four-hour session
- Mix of didactic and interactive presentations including discussions around clinical scenarios
- Touchpad technology incorporated throughout the entire presentation to involve audience and encourage discussion
- Concepts supported by online resources

### FACULTY

Stewart Harris, MD MPH FCFP FACPM

Sonja Reichert, MD MSc CCFP

Betty Harvey, RNEC BScN MScN

Amanda Mikalachki, RN BScN CDE

### AGENDA

- Welcome and Overview
- Prescribing Beyond Metformin
- Break
- Prescribing for Cardio-Renal Protection

### TESTIMONIALS

“Really appreciated the review and the message of right drug – right patient. Great review of all meds and their mechanism of action.”

“Excellent! The course recognizes the backgrounds of practitioners and adds to it in common areas of concern.”

“Very interactive. Absolutely loved the clickers! Great case studies.”

“By far the BEST session I've attended in diabetes. Clear, practical, appropriate.”

“The additional education increases comfort and ability when seeing clients.”

“Very helpful and informative session. Totally worth coming.”
